Newsletter

March 2009

The ARC is a not for profit organization as stated under Section 501(c)(3) of the Internal Revenue Service Code. Donations are tax deductible according to IRS standards

Thank you....

to the individuals or organizations listed below who recently made contributions to the ARC: Florists Mutual Insurance Company, Florists' Mutual Insurance Employees' Fund, Jeff & Dorothy Ebbeler, Alton Foundation, Randy & Virginia Clark, Rocky & Gina Eveans, Helmkamp Construction, Conoco Phillips, Heitz Optical, John & Jayne Simmons, Ron & Mary Jo Cote, Richard & Jeanne Bartunek, , Knights of Columbus Council #460, On the Spot Car Wash, Marsha and Melanie Schmidt, Patricia Kiely, Betty Dukes, Roxey at Norb's Tavern, Mark and Theresa Eagan, Sanders Waste, Mr. & Mrs. Eugene Howell, Mr. & Mrs. John Grounds, Myrna Mandorca and Joan Keenan, Eunice Brown, Jean & Charsel Rigdon, Debbie Cutwright, Stephen Link Family, Kathy Germscheid, Mike and Barbara Montgomery, Debbie & Jay Rowden, and Bob Searles.

We have received donations in memory of or in honor of: Thomas C. Jun, Jr., Janet Dunnagan, Jeanne Wiedman, Harold and Marcella Swinney, Linda and Jennifer Groesch, Dylan Howell, Cyril & Doris Arkell, Andy Schoppet, Myrna Shaw, Quentin Foiles, Dylan Ross, Shirley Lange, and Mrs. Searles. Thank you to their families for remembering the ARC.

We are very appreciative of the generosity of these individuals, which helps us fulfill our mission:

To provide the highest quality of services and programs to children and adults who have a developmental disability that reside in Madison County.

Mark your calendars for the following dates:

The 15th Annual ARC Prom, *Living the Luau*, is April 25, 5:00 – 8:00 p.m., at the Roxarena in Roxana, Illinois.

Special Olympics is **Sunday, May 3** this year at Highland.

Do you have: Manual wheelchairs

- Manual wheelchair parts
- Walkers (with or without wheels)
- Metal canes (any style)
- Metal crutches (any style)?

If you or your friends have any of these items stored in the garage, basement or attic wondering what to do with them, call **Wheels for the World**, Bob Stauder at 618-799-8976. They will pick them up and provide a donation receipt for tax purposes. Inmates at 18 state and federal prisons refurbish the used wheelchairs to "like-new" condition. Volunteers travel to 16 countries to distribute over 6,000 wheelchairs. You will bless a child or adult in another country with the gift of mobility with your donation.

Following is a summary of our annual report for Fiscal Year 2008. It is being shared with consumers, stakeholders and funding agencies.

*Developmental Training Program (DT) CARF ACCREDITED
..... Bill Lawson, Program Director*

The William M. BeDell Achievement and Resource Center Developmental Training Program (DT) served a total of one hundred forty-two (142) Individuals during Fiscal Year 2008. At the end of the fiscal year, one hundred thirty-three (133) individuals were being served. Ten (10) new individuals were enrolled and nine (9) cases were closed during the year. Individuals served were spread between three (3) counties: Madison, St. Clair and Macoupin County. The age of the individuals served ranged from twenty-one (21) to seventy-eight (78) years of age. The program was open two hundred forty (240) days during the year. The Program Coordinators worked closely with all residential facilities and guardians as a team, to ensure that an individual-centered plan was developed on the specific needs and desires of each individual served.

During the 2008 Fiscal Year:

- 4 individuals passed away,
- 2 individuals transferred to other programs,
- 2 individuals moved to skilled nursing facilities, due to the need for medical care, and
- 1 individual chose to discontinue services.

Seventy-five (75) percent of the individuals served, which is a three (3) percent increase from the last fiscal year, worked on sub-contract jobs for Cooper/B-Line and St. Louis Braid Company. The sub-contracted work consisted of assembly and packaging of small construction materials and cutting, packaging and labeling of shoestrings.

The DT Program continues to provide opportunities for individuals to participate in community activities. The individuals were offered the opportunity to demonstrate volunteerism by recycling aluminum cans, newspapers, magazines and cardboard. They also shredded paper for the local Humane Society for animal use. Individuals are also given opportunities for community integration. Several individuals viewed an air-show at Scott Air Force Base, and others participated in the Madison County Fair. There were numerous trips to community parks, as well as shopping trips and visits to local museums. There was a variety of in-house activities, including holiday parties, Karaoke parties and dances. Several individuals also participated in the Dental Screening and in the Metro-East Network for DD Services Consumer Day.

Programmatically, all individuals that are served participate in a variety of training programs tailored to their specific needs. Training may include functional communication skills, independence/self-sufficiency skills, personal self-care skills, job performance skills, work-related behavior and socialization skills. Structured routine, appropriate activities, sensory stimulation and environmental situational changes are all part of the learning experience that is provided at the DT Program. All individuals also participate in Health, Rights, Safety Training, and many individuals participate in the Consumer Advisory Committee.

Staff training continues to be a priority. All staff must be certified as a Direct Service Person and must complete forty (40) hours of classroom training and eighty (80) hours of OJT activities, as required by the Department of Human Services. Training in CPR/AED and First-Aid, as well as Rule 50 Identification and Reporting of Abuse/Neglect is provided annually. The six (6) QMRPs have each completed more than the twelve (12) hours of continuing education credits per year through a variety of educational venues.

The Developmental Training Program currently employs forty-one (41) full-time employees and three (3) part-time Registered Nurses. The program holds certifications by CARF, The Rehabilitation Accreditation Commission, The Department of Human Services and The Department of Labor, Special Minimum Wage Rates. The facility is also inspected by the Alton Fire Department, Fire Safety, Inc., Office of State Fire Marshall, National Fire Suppression, Kane Mechanical, Illinois Department of Transportation, Simplex-Grinnell, as well as the Agency Health and Safety Committee.

***Family Support Services/Case Coordination (FSU) CARF ACCREDITED
..... Carla Crawford, Program Director***

The Family Support Unit provides a variety of services to individuals and their families including Case Management, Respite Care, and service facilitation for the Family Assistance Program and Home-Based Support Services Program. Staff of the FSU include six full-time employees and one part-time employee. The FSU also supervised two practicum students from SIUE and utilized consultant psychologist services from Dr. Golden.

During Fiscal Year 2008, a total of 156 individuals received our services. Twenty-nine individuals received Case Management, 69 were enrolled in the Respite Care Program, and service facilitation was provided to 22 Family Assistance Program Participants and 42 Home-Based Support participants. Six individuals were involved with more than one program. There were fifteen case openings and 20 case closings or transfers. Staff of the FSU made 2,622 face-to-face visits with clients and/or their families, had 5,455 telephone contacts, and traveled a total of 34,751 miles to provide needed services. Fifty-two referrals were made to the FSU, some requesting our services and others requesting general information about disability and community resources, entitlement benefits, etc.

The Family Support Unit serves clients of all ages who reside in various settings. Last year 48% of the individuals served were 18 or younger. Forty-six percent were 19-65 years old, and 6% were 66 or older. Fifty-nine percent of the individuals were male, while 41% were female. Twenty percent lived in their own home or apartment, 74% lived with family, and 6% lived in a group home, shelter care or other setting.

Once each quarter the Family Support Unit hosts a Consumer Advisory Group meeting in the ARC cafeteria. The meetings continue to be well-attended with an average of 15 participants. The main focus of the meetings is to share information that can help us all live happier, healthier, safer, and more productive lives. Guest speakers, including our own Dr. Golden, have graciously made themselves available to speak to the group about important subjects. Topics during Fiscal Year 2008 included: The Madison County Transit System, Aging and Related Issues, Healthy Relationships and Personal Boundaries, and Fire Safety at Home. The participants enjoy socializing with their peers and meeting new people. Once a year the participants are asked to give input about the meetings and areas of interest that should be addressed in the future. Their input is valued and is used to plan subsequent meetings.

Four newsletters are also published annually to provide our clients with information about self-advocacy, community resources, safety issues, entitlement benefits, and other topics pertaining to living their lives independently. Individuals served by the FSU are encouraged to offer articles, interviews, or any other material they feel would benefit others.

It is important to the Family Support Unit to know if our staff are providing quality services. Each spring we distribute satisfaction surveys to all of the individuals we serve and/or their families. We also send surveys to our stakeholders, i.e. staff from other service agencies, businesses, etc. with whom we work to coordinate services for our clients. One hundred percent of the surveys returned indicated satisfaction with the programs and services received from the Family Support Unit staff.

Recreation

..... *David Logan, Program Director*

The Recreation program provided recreation activities for approximately 50 individuals per week. These individuals live at home, ARC CILAs, Burt's Shelter Care, and Thelma Terrace. A major goal has been to provide diverse activities for individuals in the ARC's Residential Program. Efforts are made to participate in local and inexpensive activities. Participants are also involved with ten dances per year. These dances are sponsored by Residential Options, Wood River Moose and the Wood River Roundhouse has a Valentine's dance. Three to four residents participate in a week long overnight camp at Camp New Hope in Mattoon, Illinois each summer. The Recreation vehicle is available for substitute use in the ARC School Program. Transportation is provided to ARC CILAs to dances held three to four times a year by Challenge Unlimited. Transportation is also provided to doctor appointments for individuals who live in our CILA homes.

The Special Olympics continues to be a major focus of the Recreation program.

Residential Program..... CARF ACCREDITED

..... *Jan Tolliver, Program Director*

The ARC Residential Program began Fiscal Year 2008 with 23 residents. However, one resident left the program in the first quarter, and a new resident moved into the program the second quarter. We, therefore, ended FY 08 with 23 residents.

We also continue to work with a married couple in a shelter care home in Bunker Hill, by visiting and taking them shopping.

The ARC Residential Program continues to be individual-centered. Annual Service Plans are developed for each person based on the specific needs and desires of the individual served. Each home is inspected quarterly by the ARC Safety Committee, and at least monthly by the QMRP and/or the Program Director to ensure that each residence is clean, comfortable and safe. Safety and maintenance concerns are addressed by either the ARC Maintenance Department or the landlord from whom the home is leased. This fiscal year, the homes continued to be approved by CARF and the Illinois Department of Human Services, Office of Accreditation and Licensure.

Each home is staffed with a full time, live-in Residential Supervisor and a full time Relief Supervisor. We believe that having two full time staff provides greater stability and consistency in the home than regular shift staff. We also believe that smaller homes with two or three residents better serve the individual needs of the population we serve.

This year, the ARC Residential Program had five outcome management objectives: one for effectiveness, one for efficiency, one individual satisfaction and one stakeholder satisfaction, and one accessibility.

For Fiscal Year 2008, three planning goals were identified:

- The first was to continue to improve and maintain safe, comfortable, and attractive homes. Maintenance was able to keep on top of repairs and updates within the homes, and furniture and appliances were replaced as needed. We relocated one home from Central Avenue in Wood River, to a brand-new home on Park Lane, which is fully wheelchair-accessible. It is, by far, our nicest home to-date.

- Secondly, we have continued to provide our residents with qualified, well-trained staff. Each home was staffed with a full-time Residential Supervisor, and a full-time Relief Supervisor. There was very little unnecessary staff turnover. Of the 18 full-time employees who work in the ARC Residential Program, 14, or 77%, were employed in Fiscal Year 2007 as well.

- Our third planning goal was to continue to seek the most cost-effective means of providing high-quality, individualized services to the residents in our homes. Although we began the fiscal year with 21 residents, which were down one from the previous full capacity of 22, we ended the fiscal year with 23 residents. This is the largest number of residents ever served in our program.

For fiscal year 2009, we will continue to improve and maintain safe, comfortable, and attractive homes. We will continue to provide our residents with well-trained, qualified staff, and we will continue to seek the most cost-effective means of providing high-quality, individualized services to the residents of our homes.

School Program..... NCA ACCREDITED
..... Cheryl Blaha, Program Director

During Fiscal Year 2008, the School Program served 84 students from 19 school districts in Madison, St. Clair, Monroe, and Jersey counties. Enrollment ranged from 68 to 72 students, with an average enrollment of 69 students for 217 days of attendance. Sixteen evaluations for placement were completed by ARC school staff as part of the intake process.

This year began with eight classrooms. Twenty-four new referrals were received during Fiscal year 2008. Four of these were from our Early Intervention Program. Each of the eight classrooms are staffed by a certified teacher, two to three teacher aides, and foster grandparents. Two classrooms had “personal care aides” for one of their students. Average Daily Attendance (ADA) was 7.6 per room and 57 for the school with an overall ADA of 82 percent.

Throughout the year, 12 terminations of student placements occurred: one was due to the family moving, two “aged out,” two attended Summer School only, two students passed away, two students transferred to another non-public school, one student became too medically involved to attend school and one transferred to a public school program. Programs focus on the following skill areas: expressive/receptive language, fine motor, gross motor, oral motor, sensory motor, self help, cognitive, activities of daily living, pre-vocational, and socialization. Support services include physical therapy, occupational therapy, speech therapy, behavior enhancement, case management, nursing, and assistive technology.

There were 106 student staffings held for the purpose of placement, program concerns and development, review of Behavior Enhancement programs, annual reviews, and placement change. In preparing for the annual review, 60 home visits were made by classroom teachers and support staff to the students’ homes. If a home visit was not possible or desired by the parent, a meeting was held at school.

Students were taken on numerous field trips throughout the year to provide community integration experiences. These included outings to the local grocery stores, fishing, shopping malls, parks and swimming pools. The School Program is taking a break from “Buddy Days.” The School Program attended the Madison County Fair (40 attended). Thirty (30) students participated in the Area 12 Special Olympics in May. The yearly hearing screenings were held in November, and 38 students participated. The yearly dental screenings were held in October and 33 students were screened. Students from Classrooms 3, 5 and 7 decorated a Christmas Tree in Rock Springs Park. The School Program’s “Santa’s Workshop” was held. The 14th Annual Prom, “Take me Out to the Ball Game,” was held at the Rox-Arena.

Staff were provided with 30 in-services on such topics as feeding techniques, child syndromes, problem solving, sensory defensiveness, swimming, oral motor treatments, and proper carrying/lifting techniques. Nine ISBE workshops were offered to staff needing to earn CPDUs for recertification on such topics as Feeding Disorders. I.A.A., CPR, Best Practices, Functional Behavior Assessment, Hearing Impairments, and Enhancing Relationships.

The School Program provided transportation for 27 individuals. Through a contractual agreement with the Edwardsville, Granite City and Madison school districts, 17 students ride three ARC vans. First Student began transporting Granite City and Madison students in February 2008. Transportation was also provided for ten students who attended the center-based component of ARC’s Early Intervention program.

The NCA Committee chose to continue with the goals for communication and ADL. Satisfaction surveys were completed with feed back from parents, community stakeholders, and staff. Results indicate

we are doing a great job. The current focus is on using picture scheduling school-wide and creating a base of pictures common to all.

*Committees
.....Quality Assurance, Safety, Human Rights/Behavior Enhancement,
..... Infectious Disease, Training*

The focus of the **Quality Assurance Committee** during the 2008 Fiscal Year was to review Quality Assurance Committee purpose, procedures, duties, etc. and decided that it needed to be revised. Each director discussed current Quality Assurance measures that are taken with:
Incident/Injury reports (staff and student)
Classroom monthly reporting/documentation
Therapist Weekly Activity sheets
Permanent Record files (staff and student).

The Quality Assurance Committee decided that any Quality Assurance concern be addressed during the Clinical Director's meeting. The Quality Assurance Committee Chairperson will ask if there are any Quality Assurance concerns. It will then be determined if it warrants a separate meeting to resolve/correct/revise or discuss further.

The **Health and Safety Committee's** current membership includes the following personnel: Bill Lawson, David Harris and David Logan.

The Safety Committee continues to ensure that the individuals served live and learn in environmentally friendly facilities. Its primary purpose is to monitor the health, safety and environmental atmosphere of the facilities that are utilized by the agency. Included are the Administrative/School Services building located in Wood River, the Developmental Training Program located in Alton, and seven (7) CILAs located throughout Alton and Wood River. The survey committee completed the following duties during Fiscal Year 2008:

- The Accessibility Survey was completed.
- Four quarterly surveys were conducted by the Safety Committee for all facilities that are utilized by the agency. During the surveys, water temperatures were tested as well as checking the water heaters. Smoke and carbon monoxide detectors, First-Aid supplies, general safety issues or concerns and the overall environment of the facilities were reviewed and discussed. Reporting on findings were issued to Program Directors, who then follow-up on findings.
- Injury/incident reports for the Residential Services Program and the Developmental Training Program were reviewed monthly.
- The Agency Emergency and Disaster Plan was reviewed and updated.

The Committee will continue to assist the Agency by ensuring that all health and safety standards are adhered to as required by the Department of Human Services, the Department of Public Health, and CARF guidelines.

The **ARC Training Committee** met once in Fiscal Year 2008. Information was shared regarding staff training required in the adult programs.

In the Family Support Unit, Kirsten O'Donnell and Daad Hariri have completed more than half of their QMRP training. Andrea Welsh and Marcie Boyce are now both QMRP trainers.

The Department of Human Services has just announced that DSP classroom training is now available online. We will, however, continue to send our new employees who require the training to Challenge Unlimited for their classroom training. OIG Rule 50 training is available on CD-ROM.

Other suggestions for no-cost inservice training include:

- Call for Help
- Alzheimer's Association
- Jo Coleman, RN at DT

We will continue to share with each other any information regarding no-cost training resources.

The purpose of the **Human Rights/Behavior Enhancement Committee** is to ensure the rights of the individuals served by The William M. BeDell Achievement and Resource Center are protected, and that services provided represent the least restrictive treatment/training model. The committee's membership includes representatives from various agency programs and from the community. The committee meets quarterly at a minimum, or as needed. Behavior enhancement plans are reviewed for recommendations and approval. Behavior modification interventions are reviewed to assure they are not potentially aversive. Maintaining the right of confidentiality of individuals served is a priority. The Human Rights Committee continues to focus on ways the agency may better ensure the rights of individuals served. We collaborate with the Agency Director, Program Directors, and other committees (Quality Assurance in particular) in facilitating this process.

The **Infectious Disease Control Committee** meets annually, or as needed, to establish and review policy to ensure proper management of infectious disease as it pertains to the individuals served by the ARC. The Committee met once in Fiscal Year 2008. The committee members, along with Cheryl Blaha, School Principal, a guest at the meeting, discussed concerns about the growing prevalence of MRSA (Methicillin Resistant Staphylococcus Aureus). Dr. Janis Robinson (committee member) stated that MRSA is becoming much more common among the general society. MRSA infections may appear as lesions or boils which often are red, swollen, painful, and have pus or other draining present. These lesions often appear at the site of visible trauma, such as cuts or abrasions, or areas of the body covered by hair. The infection is usually transmitted via direct skin-to-skin contact or contact with a contaminated surface, but may also be acquired via contact with airborne nasal discharge or body fluids. Dr. Robinson stated that it is essential that Universal Precaution Procedures be followed to prevent the spread of MRSA. She also said that only a few drugs are currently effective in treating MRSA, including Bactrim and Altaban. Subsequently, Dr. Robinson contacted Dr. Gray Storch, Director of the Infection Control Unit at St. Louis Children's Hospital for further clarification of treatment. The Committee developed a brief MRSA Protocol, which was distributed to the Agency Executive Director and all Agency Supervisors. A copy was placed in the ARC Infection Control Manual. An Eradication Protocol was attached to the protocol to aid in the treatment of MRSA (if needed). Training opportunities remain the same as noted in previous reports. Thirty-six staff were trained on the CPR/AED (automated external defibrillator) protocol on August 11 and 12. The agency nurse continues to monitor persons served by the agency for any possible infectious disease. The Committee will continue to meet annually or on an "as needed" basis.

Statement of Financial Position
